

COMPLETE SERVICE, SUPPORT AND RENEWAL FOR DUPPS-GRATT
AND MOST BRANDS OF HORIZONTAL BOWL DECANTERS AND
DISC-STYLE VERTICAL CENTRIFUGES.

DUPPS CENTRIFUGE SERVICE GROUP

COMPLETE CAPABILITY, RAPID RESPONSE

The service technicians and engineers of Dupps' Centrifuge Service Group offer over 50 years experience in evaluating, maintaining, troubleshooting and renewing nearly all types and brands of decanters and centrifuges.

Our staff is expert in every aspect of maintenance and repair of decanter and vertical disc centrifuges, including bowl, bearings, seals and hardfacing. With the experience and specific tools necessary to properly service most brands of equipment, we can maintain your system at peak operational efficiency with minimum downtime.

- Comprehensive repair, maintenance and renewal service for horizontal bowl decanters and vertical disc centrifuges.
- A full inventory of bearing kits, seal kits and other maintenance parts for all models of Dupps-Gratt decanters and centrifuges — **plus, an extensive inventory of consumable parts for other models of horizontal bowl decanters and vertical disc centrifuges.**
- Route truck pick-up and delivery service for non-emergency repairs.
- Complete evaluation of worn or damaged equipment to determine the best course for bringing your equipment back to specification, including a detailed report and quotation for repair.

24 x 38 and 18 x 28 decanters before and after renewal.

A comprehensive report and quotation is given after the equipment is thoroughly cleaned and inspected for cracks and other repair needs. All bearings and seals are replaced, areas of excessive wear are repaired and, if required, the gearbox is rebuilt. Configuration options are presented for process improvement or extending repair longevity.

- Vibration analysis and tracking systems are available for evaluation of equipment condition and service life. This service includes a computerized vibration analysis of key components and component bearings to estimate remaining service life of equipment.
- A spindle exchange program for several makes and models of vertical disc centrifuges; loaner/exchange gearboxes for many commonly used decanters.
- Rental equipment is available while repair work is being performed; subject to availability and customer's process requirements.
- Maintenance contracts take the guesswork out of scheduled decanter and centrifuge maintenance.

Exclusive CIP (Centrifuge Inspection Program)

Scheduled inspection, analysis and maintenance recommendations for horizontal bowl decanter and vertical disc centrifuges helps to assure continuous peak performance, and prevent minor issues from becoming major problems. CIP also includes an evaluation of process performance to assure optimal system efficiency and productivity.

With over 80 years experience, **The Dupps Company** continues to serve the protein recycling industry with the world's most complete line of systems and machinery, as well as unsurpassed engineering and service capability to create better ways to recycle protein by-products into profitable meals and fats. Dupps equipment and experience also provides other industries — including fishmeal and oil seed processing — with innovative solutions to operate more efficiently and sustainably.

Dupps engineering, manufacturing and service translate your needs into specific solutions, whether you need one piece of equipment, an integrated system, a complete turnkey processing facility, or a retrofitted upgrade to your existing equipment.

Dupps Separation Technology includes Dupps-Gratt Centrifuge Technology and the Dupps Centrifuge Service Group. With a full line of proven, high-performance centrifugal decanters, centrifuges and accessories backed by responsive, expert service, Dupps Separation Technology assures customers of reliable, efficient operation and maximum uptime.
