

DUPPS PRESSOR® SQUEEZES MORE PROFIT FROM OIL SEEDS

21st Century Press Technology

Grow your oil extraction profits with the high-volume, high-quality, high-tech Dupps Oil Seed Pressor®. This USA-made press is ideal for soybeans and other Identity Preserved crop products.

Higher Production

Old expeller-type technology often tops out at 1,000-1,500 pounds per hour: about 18 tons per day at best. A single Dupps Oil Seed Pressor® can process 50-100 tons per day.

Lower Residuals

Ordinary mechanical extraction wastes profit by leaving up to 8% residual oil. The Dupps Pressor® can produce as low as 5% residuals, increasing your profit on every bean you squeeze.

Easy Operation

A simplified design features a large feed hopper that eliminates the need for a down feed and drive. An extra rugged gear box (designed and built by Dupps) and heavy duty bearings run in oil to minimize maintenance.

Proven Reliability

In operation since 1989, the Dupps Oil Seed Pressor® was designed for a lifetime of reliability with low maintenance, high capacity, and low cost of operation.
