

# PRESSOR®

**Dupps Pressor** high pressure screw presses are available in a wide range of sizes and configurations to meet every rendering application—from the largest, with a 13" shaft for increased throughput and improved feed capability on soft, difficult-to-press materials, to a compact and efficient 7" model ideal for smaller plants requiring only 1,500 pounds of pressed cake per hour.

Designed to produce lower fat cake from a variety of materials, Pressors are available with horsepower ratings between 60 to 300 HP and a choice of shaft configurations. All Pressor models offer proven reliability, rugged construction and feature a single motor to drive all mechanical parts.
