### **The prelude to Earth Day: National Rendering Day, April 21, 2023**

GERMANTOWN, OHIO — As we prepare to celebrate Earth Day on April 22, The Dupps Company invites everyone to commemorate history’s ‘original recyclers’ — animal by-product renderers that first began playing an important role in the Green Revolution centuries ago!

Friday, April 21, 2023 has been designated as the inaugural National Rendering Day, when we will recognize those rendering companies around the world that recycle millions of tons of animal byproducts annually, material that would otherwise go into landfills and contaminate our environment. By converting the 50% of the animal that we don’t eat into essential products, renderers assure that the ‘whole animal’ is used and that nothing goes to waste. Among those products are vital ingredients for livestock feeds, biofuels, industrial oils and fats, personal care products and pet food.

The Dupps Company is proud to support the worldwide rendering industry with the equipment and services it needs to operate at peak efficiency. Frank Dupps, president of the company, notes that “Celebrating the tireless efforts of renderers is the perfect prelude to Earth Day. By transforming a fully renewable resource into valuable products while at

the same time helping keep our environment clean and eliminate waste — nothing illustrates sustainability better than rendering.”

By establishing National Rendering Day, the North American Renderers Association (NARA), is bringing awareness and appreciation to the importance of the industry’s contributions to the economy, environmental protection and food waste reduction. To learn more about renderers and rendering, go to [www.NARA.org](http://www.NARA.org).

-----

**Serving those who renew, recycle and sustain**

Dupps Company is a worldwide leader in protein recycling systems and service. From its founding, Dupps has focused on renewable resources, including rendering companies around the world with a comprehensive range of protein co-products processing equipment, service and support for red meat, poultry and fishmeal applications.
