The Dupps Company expands operations – opens new facility in Oklahoma City

GERMANTOWN, OHIO — The Dupps Company announced today that it has opened a new Parts, Repair and Service facility in Oklahoma City, OK. This marks the company's sixth US location. All Dupps' facilities serve the rendering industry for faster turnaround on equipment, parts, repairs/rebuilds, field service and route truck service. The new 12,000 sf site is currently stocking parts and will be fully operational by mid-spring. Among other things, service capabilities will include Dupps' Pressor® cage and shaft repairs along with rebuilding all brands of lamella pumps, and raw material grinders commonly used in the rendering industry.

According to Frank Dupps Jr., President of The Dupps Company, the new facility is in keeping with the company's ongoing commitment to better serve the rendering industry. "We're excited to announce the launch of this new location as we continue to look for ways to improve our responsiveness and improve the customer experience." Mr. Dupps goes on to say. "The focus on continuous improvement through our *More, Better, Closer, Faster* set of lenses has helped us stay on course with what matters most to our customers. This is an ideal location to better serve customers in Oklahoma, Texas, Louisiana, Arkansas, and Kansas."

The Dupps Company is a worldwide leader in protein recycling systems and service. From its founding, Dupps has focused on renewable resources, starting with the 'original recyclers' — those rendering companies around the world that recycle millions of tons of animal byproducts every year. Dupps offers a comprehensive range of protein co-products processing equipment, service and support for red meat, pork, poultry, and fishmeal applications.

Serving those who renew, recycle and sustain

We continue to grow our capabilities, expanding our products and service to include:

- Oil Seed Processing
- Insect Protein Processing
- Pulp & Paper Dewatering
- Special Process Applications
